E AMBIENTALI

Piano Lauree Scientifiche ^{PLS}

COMUNE DI CATANIA

XXV Edizione delle Giornate di Paleontologia
Catania, (3)4–6 giugno 2025

PROGRAMMA

Sedi del congresso:

Aula Magna del Palazzo Fortuna, Dipartimento Economia e Impresa, **Corso delle Province 36**

Palazzo Ramondetta, Dipartimento di Scienze Biologiche, Geologiche e Ambientali, **Corso Italia 57**

Martedì 3 giugno (attività precongresso)

13.30 – 16.30	XII EDIZIONE DELLA TAVOLA ROTONDA PAIP – PALAEONTOLOGIST IN PROGRESS <i>12 anni di PaiP: un bilancio e uno sguardo al futuro</i>
17.00 – 18.30	VISITA GUIDATA DEL CENTRO STORICO DI CATANIA Punto di raccolta: Piazza Duomo sotto l'elefante
19.00	ICEBREAKER PARTY — Aperitivo di benvenuto con i saluti del Direttore del Dipartimento di Scienze Biologiche, Geologiche e Ambientali Prof. ROSOLINO CIRINCIONE

Mercoledì 4 giugno

8.00 – 9.00	REGISTRAZIONE	
9.00 – 9.30	SALUTI ISTITUZIONALI del Magnifico Rettore Prof. FRANCESCO PRIOLO , del Direttore del Dipartimento di Scienze Biologiche, Geologiche e Ambientali Prof. ROSOLINO CIRINCIONE e del Presidente dell'Accademia Gioenia di Catania Prof. DANIELE CONDORELLI	
9.30 – 10.30	INVITED TALK — LUIGI BIGNAMI <i>Paleontologia, ma non solo, per tutti: le sfide della comunicazione scientifica</i>	Abstract book p. 11
10.30 – 11.00	COFFEE BREAK e SESSIONE POSTER	
11.00 – 13.00	Sessione 1 Moderatori: CAROLINA D'ARPA, ADRIANO GUIDO	
11.00 – 11.08	MARINA ADDANTE et al. — <i>The calcareous nannofossil response from the Pliocene Warm Period to the Plio-Pleistocene transition: evidence from the Piacenzian and Gelasian type sections in Sicily</i>	13
11.08 – 11.16	ISACCO ALBERTI & FRANCESCA BORCHI et al. — <i>Project "Linda.": one collection, many outcomes</i>	14
11.16 – 11.24	FABIO ALFIERI et al. — <i>Diversity and adaptation in avian wing bone inner structure: insights from extant and extinct Strisores</i>	15
11.24 – 11.32	LUCIA ANGIOLINI et al. — <i>Brachiopod giants revisited: the Gigantoproductini from the Mississippian of western Ireland</i>	16
11.32 – 11.40	CARMEN ARGENIO et al. — <i>Paleoceanographic and paleoclimatic changes in the SW Iberian Margin during MIS 1 and MIS 5: preliminary results from calcareous nannoplankton</i>	17
11.40 – 11.48	BEATRICE AZZARÀ et al. — <i>Reassessing fossil canids from the Eastern and the Southern African Pleistocene record</i>	18

11.48 – 11.56	ALESSIO BAGLIONI et al. — <i>Divulgare e valorizzare il patrimonio paleontologico italiano: la progettazione e l'allestimento di un ambiente digitale sull'iniziativa Fossili Regionali</i>	19
11.56 – 12.04	MARCO BALINI & A. LOCATI — <i>Late Norian ammonoids from Iran: systematics and significance with respect to the end-Triassic evolutionary crises of the Ammonoidea</i>	20
12.04 – 12.12	LEONARDO BARBINI et al. — <i>Digital reconstruction of the endocranial anatomy of the neosuchian crocodyliform Pholidosaurus purbeckensis</i>	21
12.12 – 12.20	IVAN R. BARREIRO et al. — <i>Permian Palynostratigraphy of the Athesian Volcanic District in the Southern Alps</i>	22
12.20 – 12.28	GIOVANNI BIANUCCI et al. — <i>The lost diversity of Platanistoidea: new evidence from the Lower Miocene Chilcatay Formation (Pisco Basin, Peru)</i>	23
12.28 – 12.36	GABRIELE BINDELLINI et al. — <i>New insights into the neotypic material of Spinosaurus aegyptiacus: results from recent fieldwork</i>	24
12.36 – 12.44	FRANCESCA BOSELLINI et al. — <i>Minor coral diversity loss but long-lasting coral reef crises in the early Paleogene hothouse</i>	25
12.44 – 12.52	LUCA MARIANI et al. — <i>Trajectories of coral morphological traits during the early Paleogene hothouse</i>	57
12.52 – 13.00	SIMONE LO SAVIO et al. — <i>Not only skeletons at the Paleontological Museum of Catania: model reconstruction of the Palaeoloxodon falconeri Hyblaean Pleistocene ecosystem</i>	55
13.00 – 14.30	PRANZO A BUFFET e SESSIONE POSTER Per chi lo desiderasse, VISITA del MUSEO di PALEONTOLOGIA UNICT (con registrazione durante la mattinata al banchetto di vendita gadget SPI)	
14.30 – 16.30	Sessione 2 Moderatori: ANGELA GIRONE, MASSIMO DELFINO	
14.30 – 14.38	GIULIA BOSIO et al. — <i>Stratigraphic and vertebrate paleontological investigations of the Miocene deposits at Cerros Cadena de los Zanjones (East Pisco Basin, Peru)</i>	26
14.38 – 14.46	VALENTINA ALICE BRACCHI et al. — <i>Rhodoliths from unconventional paleosettings: the Quaternary of Northern Italy</i>	27
14.46 – 14.54	ROBERTA BRANZ et al. — <i>MycPB: Strategies for the removal of fungal contaminants from plant fossils in museum collections</i>	28
14.54 – 15.02	COSTANTINO BUZI — <i>Bone pneumatizations in virtual paleoanthropology: the case study of paranasal sinuses</i>	29
15.02 – 15.10	PIETRO CALZONI et al. — <i>The Ypresian mesopelagic ichthyofauna of the Monte Solane Fossil-Lagerstätte (Verona, northern Italy)</i>	30
15.10 – 15.18	GIOVANNI COLETTI et al. — <i>Paleocene coral carbonate production: insights from Central Italy (Pennapiedimonte; Maiella Massif)</i>	32
15.18 – 15.26	JACOPO CONTI et al. — <i>The 3D Virtual Tour of the Portis vertebrate collection stored at MUST (Museo Universitario di Scienze della Terra, Sapienza): bridging conservation, dissemination, and inclusive accessibility to historical palaeontological heritage</i>	33

15.26 – 15.34	CLAUDIA COSENTINO & A. CARUSO — <i>Progressive colonization of the benthic foraminifer <i>Amphistegina lobifera</i> in the island of Pantelleria (Sicily Channel)</i>	34
15.34 – 15.42	STEFANO CRESTA — <i>Ammoniti e Biostratigrafia del Toarciano superiore-Bajociano inferiore (Giurassico) di Monte Nerone (Appennino Marchigiano)</i>	35
15.42 – 15.50	GAIA CRIPPA et al. — <i>May the sclerochemistry of mollusc shells (HAS1 settlement, Oman) reflect an intensification of the monsoon activity in the Late Holocene?</i>	36
15.50 – 15.58	F. PETRELLA, CAROLINA D'ARPA et al. — <i>Preliminary biostratigraphic data from the Upper Bajocian–Kimmeridgian succession of the Contrada Nadorello section (Sciaccia area, SW Sicily, Italy)</i>	37
15.58 – 16.06	SILVIA DANISE et al. — <i>Last Interglacial (MIS 5e, Pleistocene) fossiliferous deposits of the Mediterranean Sea: revision and future perspectives</i>	38
16.06 – 16.14	FEDERICO DE SARIO et al. — <i>Volumetric body mass estimate and in vivo reconstruction of the basal synapsid <i>Edaphosaurus</i></i>	39
16.14 – 16.22	GEMMA DONATO et al. — <i>Environmental signals in Coralligenous frameworks: the role of skeletonized invertebrates</i>	40
16.22 – 16.30	ANNALISA FERRETTI et al. — <i>Crystallinity in fossil and Recent shark bioapatite</i>	41
16.30 – 17.00	COFFEE BREAK e SESSIONE POSTER	
17.00 – 18.30	Sessione 3 Moderatori: ANNALISA FERRETTI, GIUSEPPE MARRAMÀ	
17.00 – 17.08	MARCO FOGGETTI et al. — <i>The plant fossils from the Carboniferous of Iano (Tuscany)</i>	42
17.08 – 17.16	FABIO FRANCESCHI et al. — <i>The naked truth? New insights on the Early Jurassic (Sinemurian) genus <i>Pholidolepis</i> (Osteno Lagerstätte, Como, Italy)</i>	43
17.16 – 17.24	ANGELA GIRONE et al. — <i>Distribution of the planktonic foraminifera <i>Neoglobobulimina</i> species at the Monte San Nicola type-section (Sicily): paleoclimate implications during the Pliocene-Pleistocene transition</i>	44
17.24 – 17.32	GIACOMO GOBBO et al. — <i>The perioral soft tissues of <i>Camarasaurus</i> (Sauropoda): a reconstruction based on a new investigation method for the analysis of quantitative and qualitative osteological correlates to the cranial rostral neurovascular system</i>	45
17.32 – 17.40	MARCO GOTTARDO et al. — <i>Digital reconstruction, cranial myology, and bite force estimation of an <i>Allosaurus</i> (Dinosauria: Theropoda) specimen from Portugal</i>	46
17.40 – 17.48	VALERIO GRANATA & F. IZZO — <i>Old but Gold: an insight into RTI in the “virtual paleontology” era</i>	47
17.48 – 17.56	PAOLA GUCCIONE et al. — <i>High-resolution study of climate oscillations between 5.2 and 4.5 Ma: preliminary data from the Eraclea Minoa/Capo Bianco section (Sicily)</i>	48

17.56 – 18.04	ANGELO IANNI et al. — <i>Description of a new fossil Damsel-Dragonfly (Odonata: Epiproctophora) from the Jurassic of Inner Mongolia</i>	49
18.04 – 18.12	ALESSIO IANNUCCI — <i>Large-sized suines from the Late Miocene of Hungary: a revision</i>	50
18.12 – 18.20	DAWID ADAM IURINO et al. — <i>Endocranial cavity in extant and extinct anteaters (Xenarthra, Vermilingua)</i>	51
18.20 – 18.28	LEONARDO SORBELLI et al. — <i>A new species of Latonia (Anura; Discoglossidae) from the Early Pleistocene of Pietrafitta (Umbria, Italy) and the survival of the genus in the Quaternary of Western Palaearctic</i>	82
18.30 – 19.00	SESSIONE POSTER Per chi lo desiderasse, VISITA del MUSEO di PALEONTOLOGIA UNICT (con registrazione durante la mattinata al banchetto di vendita gadget SPI)	
20.00	CENA SOCIALE presso CIRCOLO dell'UNIONE Palazzo Biscari, Via Museo Biscari 10	

Giovedì 5 giugno (Escursione)

7.45	PARTENZA da Corso Italia di fronte Palazzo delle Scienze	
9.30 – 12.00	ISOLA DI PORTOPALO DI CAPO PASSERO (Siracusa): Scogliere a rudiste del Cretacico Superiore	
12.00 – 14.00	PRANZO A BUFFET sulla spiaggia presso il Ristorante-Bar <i>U Cioscu</i> , Portopalo	
16.00 – 17.30	ACITREZZA (Catania): Biocostruzioni quaternarie di ambienti superficiali	
18.00	RIENTRO a Catania	

Venerdì 6 giugno

9.00 – 11.00	Sessione 4 Moderatori: FRANCESCA BOSELLINI, LORENZO ROOK	
9.00 – 9.08	MARCO CHERIN et al. — <i>Reassessment of fossils otters from Olduvai Gorge (Tanzania), in the light of old and new finds</i>	31
9.08 – 9.16	EVELYN KUSTATSCHER et al. — <i>Wet or dry – plants don't lie</i>	53
9.16 – 9.24	ALESSANDRO LANIA et al. — <i>Craniomandibular osteology of a new plateosaurian sauropodomorph (Dinosauria: Sauropodomorpha) from the Late Triassic (latest Norian) of Canton Aargau, Switzerland</i>	54
9.24 – 9.32	LOREDANA MACALUSO et al. — <i>New fossil remains from the Cretaceous of France shed light on the early evolution of salamandrids (Lissamphibia: Salamandridae)</i>	56
9.32 – 9.40	GIUSEPPE MARRAMÀ & G. CARNEVALE — <i>A phylogeny and revised classification of clupeomorph fishes</i>	58
9.40 – 9.48	MARLISA MARTINHO DE BRITO et al. — <i>Biosignature preservation in hydrothermal microbialites: Insights from O-PTIR spectromicroscopy</i>	59

9.48 – 9.56	GIUSEPPE MARUCA et al. — <i>From soundwaves to seascapes: advancing in Coralligenous mapping with multibeam and GIS technologies</i>	60
9.56 – 10.04	LUCA MATTEONI et al. — <i>New evidence of sauropod dinosaurs from the Bajo de la Carp Formation of the southern Neuquén Basin (Patagonia, Argentina)</i>	61
10.04 – 10.12	MATTIA YURI MESSINA et al. — <i>Microvertebrate remains from the early Eocene of SW Sardinia (Italy): preliminary note</i>	62
10.12 – 10.20	GRETA MILITELLO et al. — <i>High-resolution climate oscillations in the glacial cooling phase at the base of the Gelasian</i>	63
10.20 – 10.28	GIANMARCO MINNITI et al. — <i>Medical technology for palaeontology: Unravelling bone diseases in fossil dwarf hippos</i>	64
10.28 – 10.36	FABIO MONGIOVÌ et al. — <i>Back from the ashes: the forgotten “Fossils of the Pampas” Collection from the Milan Natural History Museum</i>	65
10.36 – 10.44	SARA MONTI et al. — <i>Il potenziale diagnostico dello scheletro appendicolare degli urodeli europei: un caso studio dall’Oligocene della Francia</i>	66
10.44 – 10.52	SOFIA MORESCO et al. — <i>Fungal activity on plant fossil collections: first insights from Raman spectroscopy</i>	67
11.00 – 11.30	COFFEE BREAK e SESSIONE POSTER	
11.30 – 13.00	Sessione 5 Moderatori: LUCIA ANGIOLINI, MARCO CHERIN	
11.30 – 11.38	FEDERICA MULÈ et al. — <i>Preliminary report on microwear analysis of herbivorous land mammal teeth from the Tuscan Pliocene–lowermost Pleistocene (central Italy)</i>	68
11.38 – 11.46	BIANCA MÜLLER et al. — <i>Life on the edge of a supervolcano: study of lower Permian bioturbations at Sesto</i>	69
11.46 – 11.54	GIOVANNI MUSSINI et al. — <i>An exceptionally preserved biota from the Grand Canyon of Arizona (USA) sheds light on Cambrian evolutionary escalation</i>	70
11.54 – 12.02	FRANCESCO NOBILE et al. — <i>A new basal delphinidan species (genus Kentriodon) from the Lower Miocene of Peru</i>	71
12.02 – 12.10	EDOARDO PAGLIUZZI et al. — <i>Geometric morphometrics as a tool to support taxonomic identification in palaeontology: a comparison with traditional morphometrics in the study of isolated fossil shark teeth</i>	72
12.10 – 12.18	LUCA PANDOLFI et al. — <i>Rhinocerotidae diversity and adaptation through the Pliocene-Pleistocene</i>	73
12.18 – 12.26	ELPINIKI MARIA PARPAROUSI et al. — <i>Dama-like deer from the Early Pleistocene localities of Libakos and Kalamoto-2 (Greece): taxonomy and biogeographical implications</i>	74

12.26 – 12.34	CHIARA PULSINELLI et al. — <i>Paleobiogeography of beaked whales (Cetacea, Ziphiidae)</i>	75
12.34 – 12.42	LORENZO RIDOLFI et al. — <i>Anatomy and phylogenetic relationships of two new Eocene species of Argyropelecus (Sternoptychidae) from the Pabdeh Formation, Iran</i>	76
12.42 – 12.50	RICCARDO ROCCHI et al. — <i>Digitization and anatomy of exquisitely preserved early-diverging iguanodontian dinosaurs from Late Jurassic of Tanzania</i>	77
12.50 – 12.58	LORENZO ROOK et al. — <i>La Paleontologia dei Vertebrati nella tradizione della scuola fiorentina</i>	78
13.00 – 14.00	PRANZO A BUFFET e SESSIONE POSTER	
14.00 – 15.00	Sessione 6 Moderatori: MARCO BALINI, GAIA CRIPPA	
14.00 – 14.08	VALENTINA ROSSI et al. — <i>In the eyes of monsters: testing the phylogenetic affinity of fossils from the Mazon Creek Lagerstätte (Carboniferous, USA) using melanin chemistry</i>	79
14.08 – 14.16	RANITA SAHA et al. — <i>Last Interglacial (Late Pleistocene, MIS 5e) shallow water mollusc assemblages from the Mediterranean Sea</i>	80
14.16 – 14.24	PIERLUIGI SANTAGATI et al. — <i>Posidonia oceanica fossil root hairs preserved in MIS 5e bioclastic deposits (Taranto, Apulia, Southern Italy)</i>	81
14.24 – 14.32	JACKSON KIMAMBO et al. — <i>Systematic and taphonomic analysis of a new palaeontological assemblage from Olduvai Gorge, Tanzania</i>	52
14.32 – 14.40	DOMENICO TANCREDI et al. — <i>Carnivores from Arena cave: Pleistocene predators' tales from Sicily</i>	83
14.40 – 14.48	MARCO VIARETTI et al. — <i>Sclerochemistry of the spiriferid brachiopod Pachycyrtella omanensis: new insights into Early Permian climate and ecology</i>	84
14.48 – 14.56	ANDREA VILLA et al. — <i>A new diminutive gecko (Squamata, Gekkota) from the Gargano "Terre Rosse" (Late Miocene, southern Italy)</i>	85
15.00 – 15.30	COFFEE BREAK	
15.30 – 17.00	ADUNANZA GENERALE DEI SOCI, PREMIAZIONI E SALUTI
